SOFTWARE ENGINEER - BACKEND DEVELOPER

Passionate and skilled backend developer with experience in building and optimizing server-side applications using Node.js and TypeScript. Proven expertise in designing scalable RESTful APIs, integrating databases, and implementing secure authentication solutions. Additionally experienced in working with C#. Committed to delivering high-performance and reliable backend services.

KEY COMPETENCIES

Collaborative Team Player	Attention to Detail	Strong interpersonal skills
Problem-Solving Ability	Customer Focus	Proactive and self-motivated
Leadership	Excellent communication skills	Exceptional organisational skills

PROFESSIONAL EXPERIENCE

Equasystems S.A.S.   **Aug 2022 - Present**
Development Leader

As a lead developer, I am responsible not only for guiding new team members but also for ensuring their effective integration into our development processes. I oversee task assignments, review and approve code, and provide feedback to ensure it meets our quality standards. Additionally, I manage and complete critical projects, particularly those focused on our U.S. clients in the insurance sector, where precision and efficiency are paramount. I work closely with other teams to optimize software architecture and enhance system performance. We utilize a robust technology stack, including Next.js, Node.js, MySQL, GitHub, and AWS, allowing us to deliver scalable, high-quality solutions that meet the complex needs of our clients.

Softdaniv S.A.   **July 2019 - Jan 2021**
Developer .Net

In my role as a .Net Developer, I led the development and enhancement of critical modules within the company's ERP system. Notably, I spearheaded the creation of a call module for portfolio agents, which streamlined communication, enabled in-call purchases, and significantly boosted sales productivity. Additionally, I led the design and implementation of an attendance registration system for a 24-hour security firm, automating shift tracking and payroll integration, which ensured accurate and timely salary calculations. These projects underscored my capacity to deliver high-impact solutions that optimize operational processes.

EDUCATION & CERTIFICATIONS

Master's in Software (May 2024 - Present)
Polytechnic Salesian University, Guayaquil, Ecuador

Bachelor of Engineering in Systems
Polytechnic Salesian University, Guayaquil, Ecuador

LANGUAGES

Spanish: Native
